

Ingredients

Aqua - Distilled Water (75% of the solution is distilled water)

Dihydroxy Acetone (DHA) - A compound of sugar. This is the active ingredient in Sunless Tanning. When applied to your skin, DHA react with dead cells in the outermost layer of the skin (the epidermis) to temporarily darken the skin's appearance.

Erythrulose- Helps to ensure your tan fades evenly. It takes 24-48 hours to begin it's affects. However it will help ensure your tan lasts considerably longer. If your client showers before that they will not see the benefits of Erythrulose. Erythrulose also helps moisturizes the skin and makes the skins a beautiful bronzed colour! The gentle enduring reaction of Erythrulose compensates for any inconsistency at application.

Aloe Barbadensis- (Aloe Vera Gel) -Soothing ingredient used as a moisturizer and an anti-irritant.

Oleo Europea - (Extra Virgin Olive Oil) - Contains powerful antioxidant that can help retain the beauty of your skin, help heal skin diseases, and make your skin tighter and firmer.

Oil Glycerin - acts as a barrier to the skin to seals in the moisture.

Helianthus annus (sunflower oil)- is an all natural, healthy way to heal skin and maintain its health; and its calming and emollient (moisturizing) properties have been known for years. Sunflower oil is helpful if you are suffering from acne, eczema, inflammation, general redness and irritation of the skin.

Organic Caramel Colour- Caramel Color is in the same category as other "natural colorants" such as annatto, beta carotene, beet juice, etc. Caramel Color is not a flavor but simply a coloring agent.

Cecropia obtusa bark extract- (natural slimming agent) an innovative local slimming and anti-cellulite ingredient, helps minimize fine lines and wrinkles.

Cetearyl Olivat / Sorbitan Olivat- Organic emulsifier from Olive oil. It reduces skin water loss, has a high moisturizing effect, is hypoallergenic and biomimics the skin.

Rosmarinus Officinalis- (rosemary) Is full of antioxidants. Rosemary and rosemary oil can effectively tone our skin (especially sagging and loose skin) and make it firmer and more elastic.

Centella Asiatica- (gotu kola) boosts circulation, improve the collagen foundation of the skin, thereby making it a superb ingredient for anti-ageing skin care products as well as improving skin firmness and elasticity.

Echinacea Angustifolia- (Echinacea) benefits include helping your skin to fight against infections, heal wounds and regenerate itself.

Calendula Officinalis - (marigold) - Antibacterial, soothing agent.

Sodium PCA- feeds moisture to the hair and skin and is most notably used as an ingredient in moisturizers. Sodium PCA is non-irritating to the skin and eyes, non-comedogenic and is water and ethanol soluble. It is not soluble in oils.

Camellia Sinensis Leaf - (Green Tea)- Green tea appears to exert sun damage protection by quenching free radicals and reducing inflammation rather than by blocking UV rays. Therefore, green tea may synergistically enhance sun protection when used in addition to a sunscreen.

Sodium benzoate - Used as a preservative, sodium benzoate is typically added to foods in small amounts only. The reason you will note sodium benzoate listed in the ingredients of so many foods is because it works very well at killing bacteria, yeast and fungi.
